- Ideal for use in amusement parks, entertainment venues, sporting events, and most public,

commercial, industrial, construction, and utility applications

Description

Yellow Jacket® 5-channel ADA cable protectors have built-in ADA accessibility ramps to provide a safe crossing for vehicle and pedestrian traffic while protecting valuable electrical cables and hose lines. Because the ramps are built-in, there is no need for separate connectors. Another unique feature of this product is that it interconnects directly to a 5-channel standard ramp Yellow Jacket® cable protector. This modular interlocking design is available in lightweight 18" sections and it includes a recessed carrying handle on the underside of the protector. Ideal for use in amusement parks, entertainment venues, sporting events, and most public, commercial, industrial, construction, and utility applications.
